

# 'Waste-to-rDME': a new era in the waste hierarchy for non-recyclable materials

**Circular Fuels Ltd** is a *specialist* project development *company for* waste conversion facilities of **non-recyclable materials** to **rDME**, a fuel that can be blended with LPG & Diesel *to defossilise the off grid and transportation sectors*.

CFL is a Joint Venture between **KEW Technology Ltd**, a *proprietary technology* company that operates a full-scale End of Waste *advanced* gasification plant, *a form of Advanced Conversion Technology (ACT)*, and **Dimeta**, a JV between **SHV Energy** and **UGI International** (two of the largest LPG global players) that will *guarantee and accelerate* the rDME commercialization.

We *enable* local communities to reach their waste diversion and disposal goals producing renewable and recycled carbon DME *enabling the shift to net zero in a circular economy framework*.
